

JASWANTH VARMA RAGHAVARAJU

Full Stack Developer | MERN Stack | SaaS & API Integration Engineer

+91-63097-78914 • jaswanthraju63@gmail.com • linkedin.com/in/jaswanth-varma-raghavaraju-48b171245 • github.com/jaswanth1590

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable web applications, enterprise SaaS platforms, and automation systems. Specialized in React.js, Next.js, Node.js, TypeScript, PostgreSQL, and MongoDB. Architected 30+ third-party API integrations (Shopify, BigCommerce, NetSuite, Google Ads, Meta Ads), reducing client onboarding time by 40%. Proven expertise in multi-tenant SaaS architecture, OAuth 2.0, microservices, Redis caching, and Docker. Passionate about delivering production-grade, high-performance products for fast-growing product companies.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript
Frontend	React.js, Next.js 15, Gatsby.js, HTML5, CSS3, Tailwind CSS, shadcn/ui, TanStack Query, Recharts
Backend	Node.js, Express.js, REST API, GraphQL, Microservices, Webhooks, Event-Driven Architecture
Databases	PostgreSQL, MongoDB, MySQL, Prisma ORM, Redis, Query Optimization, Schema Design
Auth & Security	OAuth 2.0, NextAuth.js, JWT, RBAC, Argon2, Rate Limiting, AES Encryption, API Key Management
Integrations	Shopify, BigCommerce, NetSuite, WooCommerce, Google Ads API, Meta Ads API, Stripe, SendGrid
DevOps & Testing	Docker, Git, GitHub, CI/CD, Vercel, Jest, Playwright, Puppeteer, ESLint, Postman
Architecture	Multi-Tenant SaaS, MVC, System Design, Scalable Backend Services, GDPR Compliance, Audit Logging

PROFESSIONAL EXPERIENCE

Full Stack Developer (MERN) | Algoris — Client: Alloy Automation | Remote Apr 2023 – Present

- Engineered 30+ production-grade API integrations (Shopify, BigCommerce, NetSuite, WooCommerce) using reusable modular libraries, reducing average client onboarding time by 40%.
- Architected event-driven automation workflows using webhooks and polling triggers, processing 10,000+ events/day across e-commerce platforms at 99.9% uptime.
- Implemented OAuth 2.0 and token-based authentication for all third-party integrations, ensuring zero-trust security compliance with zero unauthorized access incidents.
- Built scalable RESTful backend services with Node.js and Express.js; optimized MongoDB and PostgreSQL queries via indexing and schema redesign, reducing query latency by 35%.
- Containerized services with Docker, reducing environment-specific bugs by 60% and enabling consistent CI/CD deployments across staging and production environments.
- Achieved 80%+ Jest test coverage on core automation modules, maintaining zero critical production incidents over 12+ months.
- Designed complex multi-tenant PostgreSQL schemas with 20+ relational models, soft deletion, audit logging, and time-series data structures supporting historical analytics.
- Integrated background job scheduling (Trigger.dev) and Redis caching to reduce peak server load by ~45% and improve platform responsiveness.
- Developed React.js and Next.js frontends with Tailwind CSS achieving sub-2s page load times and 95+ Lighthouse performance scores.

- Collaborated in Agile/Scrum sprints with engineering, product, and QA teams; led code reviews and maintained documentation standards across all modules.

KEY PROJECTS

Ogno — Omnichannel Marketing Analytics SaaS Platform

Tech Stack: Next.js 15, React 19, TypeScript, PostgreSQL, Prisma ORM, Redis, NextAuth.js, OAuth 2.0, Stripe, SendGrid, Trigger.dev, Docker, Vercel, Jest, Playwright

- Architected and delivered a full-stack multi-tenant SaaS platform with unified analytics across 8+ ad/social platforms (Google Ads, Meta Ads, LinkedIn Ads, TikTok Ads, Google Analytics, Search Console).
- Designed 140+ RESTful API routes with Zod validation, session-based auth middleware, and structured error responses — powering real-time dashboards, client management, and automated report generation.
- Implemented a comprehensive RBAC system with 8 role types and org-level data isolation; built a Super Admin panel with impersonation sessions and activity logging for compliance auditing.
- Integrated Stripe for multi-tier subscription management and SendGrid for transactional emails and scheduled PDF reports.
- Engineered background sync jobs (Trigger.dev) and Redis caching for time-series metric optimization, significantly reducing dashboard data fetch latency.

Note: Proprietary project — architecture and outcomes available for discussion in interview.

API Integration Automation Platform

Tech Stack: Node.js, Express.js, React.js, MongoDB, PostgreSQL, Docker, OAuth 2.0, Webhooks

- Built a multi-tenant automation platform supporting 30+ e-commerce integrations for automated order sync, inventory updates, and fulfillment — eliminating manual merchant workflows.
- Developed a webhook ingestion engine processing 10,000+ real-time events/day (50% latency improvement); reduced per-integration OAuth 2.0 setup from 3 days to under 4 hours.

Note: Proprietary project — architecture and outcomes available for discussion in interview.

Amazon Product Price Tracker

Tech Stack: Next.js, Node.js, PostgreSQL, Puppeteer, REST API, Email/Push Notifications

- Built a real-time monitoring app tracking 500+ product listings with configurable alerts and interactive price trend charts — growing daily active users by 30% post-launch.
- Architected a PostgreSQL schema supporting 1M+ price records with sub-100ms query response using optimized indexing and time-series data modeling.

KEY ACHIEVEMENTS

- Reduced API integration onboarding time by 40% through a standardized, reusable integration framework deployed across all client projects.
- Processed 10,000+ daily automation events at 99.9% uptime, enabling enterprise clients to fully eliminate manual fulfillment workflows.
- Built and shipped Ogno — a full SaaS platform with 140+ API routes, 8+ ad platform integrations, multi-tenant RBAC, and Stripe billing from the ground up.
- Decreased deployment bugs by 60% via Docker containerization; maintained zero critical production incidents over 12+ months with 80%+ test coverage.

EDUCATION

Bachelor of Engineering — Electronics & Communication Engineering

Apr 2019 – Apr 2023

Muthayammal Engineering College, Tamil Nadu

CERTIFICATIONS

- JavaScript Developer Certification — Udemy
- TypeScript Professional Certification — Udemy
- Advanced CSS Certification — Udemy
- Advanced SQL Certification — Udemy
